INSTALLATION NOTES:

Remis Safe T Max hinged doors can be retrofit onto most multi deck case styles. No anti sweat is required with our design. Remis America will send our technical team to take detailed measurements at the store to ensure proper fit of the doors and frames. The OEM canopy lighting will be removed and discarded. We will replace it with new lights on our frame. The OEM canopy hood and lower front cladding will remain in place whenever possible. No product has to be removed from the case prior to or during the door installation. Most installations are complete in 3 or 4 days and can be done overnight to minimize disruption at your store. Remis America will do all required electrical wiring. After doors are installed, the expansion valve superheat and the EPR at the rack need to be reset by a qualified technician. 20 year warranty against seal failure. Remis America warrants our product for 15 months from the date of shipment. This warranty is limited to repair or replacement, at Remis America's discretion. See warranty agreement for complete details.
